### Browse and borrow

You can then browse the entire Hoopla collection that includes over 300,000 **books** (ebook, audiobook & comics), **music** (albums), **movies** and **television shows**!

## Just the facts...

There's no wait to borrow popular audiobooks, ebooks, movies, TV shows, or music albums. AND, you can checkout items up to **5 times** each month.

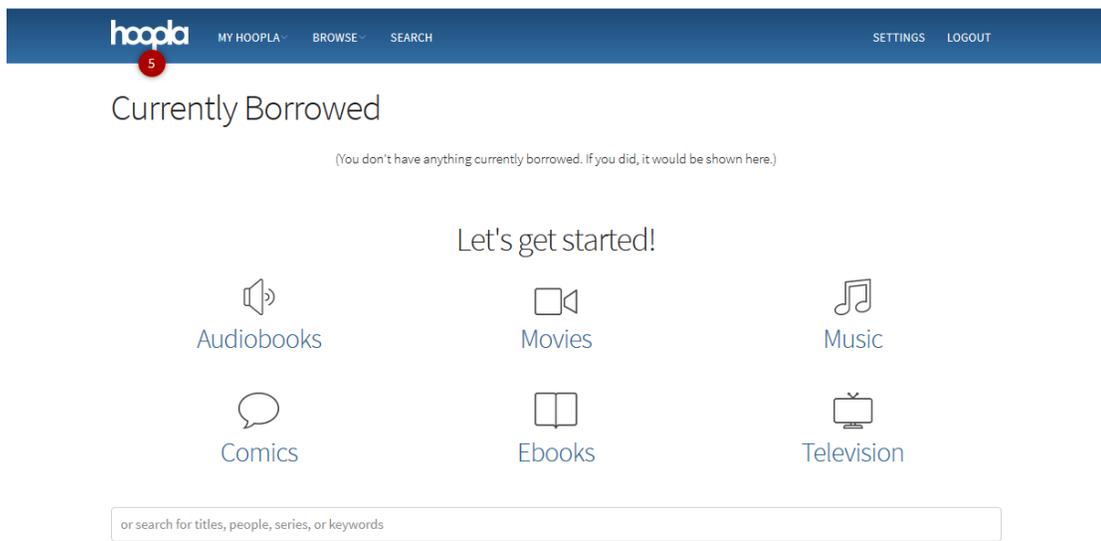

**Tip:** If it's near the end of a month, you might want to add titles to your **Favorites** list so you can start with a full month worth of checkouts.

## How does it work?

**Movies and TV show episodes:** you get for **3 Days**

**Music albums:** you get for **7 Days**

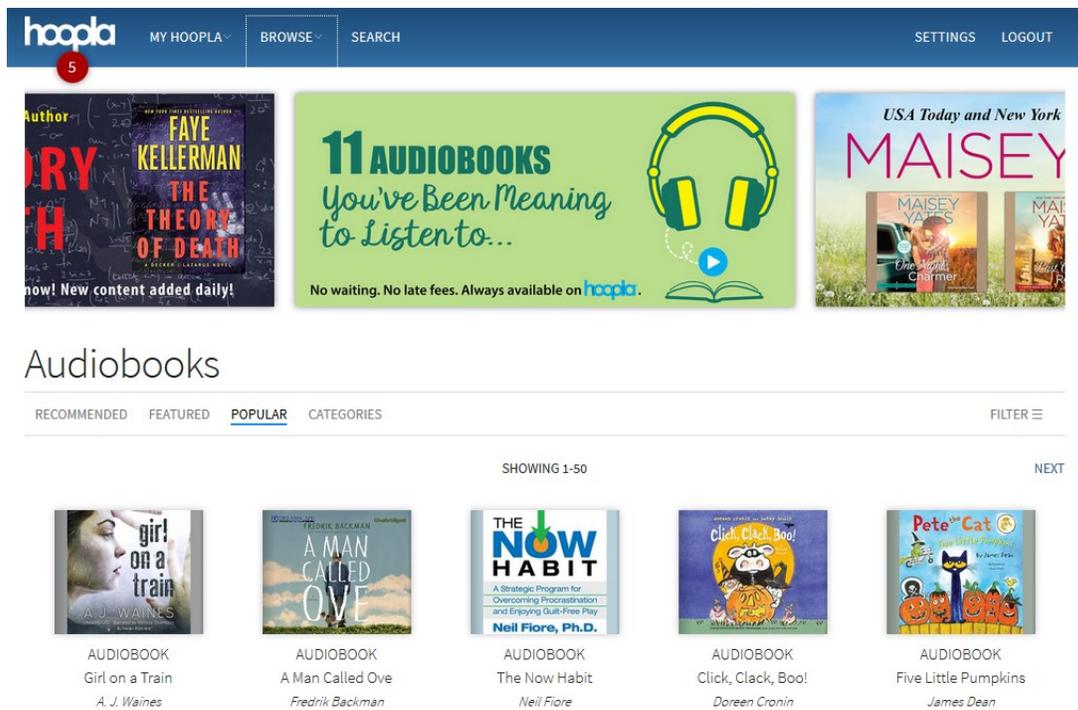

**Audiobooks, eBooks and Comics:** you get for **21 Days**

To search, choose from one of the categories or type a title, person or series in the search box at the bottom of the screen.

You can then view the list of titles and **FILTER** the list to narrow down your choices. You can also browse one of the featured lists scrolling at the top of the screen.

Once you've found a title you want, hover over the cover, click **BORROW**, and you can begin enjoying the title right away.

The titles are automatically returned at the end of the period, so you don't have to worry about any late fees. You can also return them early.

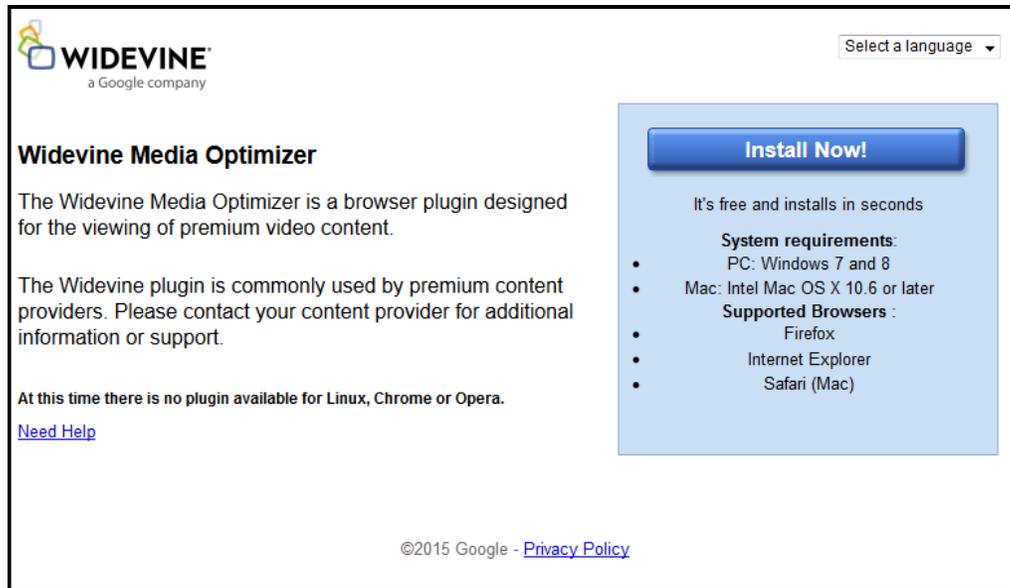

You can stream these titles on your mobile device or desktop/laptop computer (with Wi-Fi or internet connection). They can also be **temporarily** downloaded to many Apple or Android devices. To see a complete list of supported devices, or for any other questions, click **Help** at the bottom of the screen.

## Widevine

In order to watch hoopla movies and tv episodes using older internet browsers, such as Firefox or Safari (Macs) you'll need to install a program called

**Widevine Media Optimizer**

The Widevine Media Optimizer is a browser plugin designed for the viewing of premium video content.

The Widevine plugin is commonly used by premium content providers. Please contact your content provider for additional information or support.

At this time there is no plugin available for Linux, Chrome or Opera.

©2015 Google - [Privacy Policy](#)

Widevine. If you have Microsoft Edge or Internet Explorer on Windows 8/10 or Google Chrome, you won't need to use **Widevine**).

To get started with this, go to: <https://tools.google.com/dlpage/widevine>.

Follow the instructions to install and download the program. For help installing **Widevine**, check out Google's help page:

<https://support.google.com/widevine/answer/6072067>.

## Apple TV and Chromecast

You can enjoy movies and tv show episodes on "the big screen" using **Apple TV** and **Chromecast**.

**Apple TV:** To get started with Apple TV, go to:

<http://www.apple.com/support/appletv/>.

**Chromecast:** What is **Chromecast**? **Chromecast** is a thumb-sized media streaming device that plugs into the HDMI port on your TV. Simply use an Android phone, tablet, iPhone®, iPad®, Mac® or Windows® laptop, or Chromebook to "cast" your favorite entertainment and apps right to the big screen. To get started, go to: <https://support.google.com/chromecast#topic=3058948>

Hoopla is planning on adding similar options such as **Roku** in the near future.

For more information on how to get started with this service, contact **Readers' Services** at **883-3638**.
