HIGH POINT, NC (June 24, 2019) – On June 24, 2019 the City of High Point had a wastewater spill of an estimated 1,470 gallons at 3822 Eagles View Ct. Of this total, 1,470 gallons reached the waters of the state. The untreated wastewater spilled into an un-named tributary to the West Fork of the Deep River. The wastewater spill was determined to be caused by grease and debris in the line. The Division of Water Quality was notified of the event on June 24, 2019 and is reviewing the matter. For additional information or questions residents should contact the Public Services Department at (336) 883-3215.

House Bill-1160, which the General Assembly enacted in July 1999, requires that municipalities, animal operations, industries and others who operate waste handling systems issue a news release when a waste spill of 1,000 gallons or more reaches surface waters. This notice was sent in accordance with that regulation.

The City of High Point aims to serve as the catalyst for bringing together the community's human, economic and civic resources for the purpose of creating the single most livable, safe and prosperous community in America. For more information on the City, visit www.highpointnc.gov.
