¹ For this survey conducted by the High Point EDC, companies were asked to provide "fulltime-equivalent" numbers for High Point-based employees at their highest employment level during December 2017.

² Aetna's FTE numbers include work-at-home staff who report to the High Point facility. The company's 2016 survey response did not include those employees.

³ Since Quest Diagnostics chooses not to participate in these surveys, the number shown is an approximation based on a December 2016 media article.
